

By implementing a management plan for conservation and recreation for three of its natural areas—Bates Lane Conservation Area, Crosbie Family Preserve, and Appleton Fields Farm—the Town of Scituate, Massachusetts, can shift those properties toward stronger ecological resilience, provide enhanced visitor experiences, and offer recreational opportunities. These three areas are already beautiful places, but their future ecological health and usefulness will depend on continued stewardship and community commitment.

the **Conway** School
Graduate Program in Sustainable
Landscape Planning + Design

The Conway School is the only institution of its kind in North America. Its focus is sustainable landscape planning and design. Each year, through its accredited, ten-month graduate program students from diverse backgrounds are immersed in a range of real-world design projects, ranging in scale from residences to regions. Graduates go on to play significant professional roles in various aspects of landscape planning and design. Conway: Real World. Real Results.
