

-

REQUEST FOR DETERMINATION OF APPLICABILITY WILL BE REQUIRED FOR:

Buffer Zone work 50' or more from wetland delineation, providing:
little/no excavation (sono tubes, 4' deep foundation)

- relatively flat site
- modest amount of additional impervious surface
- drywells proposed for roof runoff (soil tests completed)
- siltation controls in place
- limited work site
- limited/no use of heavy equipment
- work won't affect neighbors

Example: new deck on rear of house, small dwelling addition

LETTER OF PERMISSION MAY BE ISSUED:

Buffer Zone work that is **very minor** in nature and **not likely to cause damage to the Wetland Resource Area** when a plan is set out and agreed to by the Agent after a site visit. Work which does not proceed according to the plan and/or schedule will be the subject of Enforcement action.

Example: removal of one or two trees from the Buffer Zone with stumps remaining in place and brush and logs to be taken away promptly and disposed of in a lawful manner; or, repaving an existing paved driveway in the Buffer Zone.

*Type of filing at discretion of Conservation Commission and/or Agent following review of each case.

If you have any questions, please contact the Conservation at (617) 545-8721.

Dated: 11/10/98
