

TOWN OF SCITUATE

Plan for the Scituate of the future!

In this public workshop of March 25, attendees will discuss Managing Change. The dialogue will examine how to handle expected and unexpected future trends and the trade-offs to achieve a balanced sustainable growth. How do we achieve our goals? What are the roles the community, the public and private sector, current and future generations play? Attendees will develop a preferred scenario based on the previous workshop.
