The Town of Scituate Recreation Commission endorses the CPC proposal from Scituate Little league to build a 90-foot baseball field.

The Rec Commission recommends the field be built at the current recreation field (old Gates). This location is different from the initial proposed location from little league, but after input and deliberation from the other organizations in town the commission is recommending this location for the construction of the much needed 90-foot baseball field. The field dimensions, exact location and amenities will be determined before CPC votes on this proposal. It will still serve as a multi-purpose field for various sports and activities with the field coordinator scheduling field usage.
