

Posted on: November 9, 2016 - 11:43am

The rains the past week have greatly helped our water situation. The graph below shows the change in the past seven days. The reservoir is 39.6% full. While this is good news, please note it is DOWN from this time last week. Conservation efforts by residents and businesses has been the most important reason for where we are now. The Drought Management Task Force will be meeting again on November 15 to look at current restrictions. Until then, full restrictions are still in place. Thank you for your cooperation.

R = Rain    S = Snow

T = Trace / No Measurable Amount
