

Bound Brook Restoration

At Hunters Pond Dam

You're Invited

Please join us for an informal presentation on plans to restore the habitat of Bound Brook through the removal of the Hunters Pond Dam.

Scituate Harbor Community Building
44 Jericho Road
Scituate, MA

Tuesday, February 24
6:00 - 7:00 PM

Brief presentation followed by discussion.

PROJECT DESCRIPTION

Bound Brook flows from Ames Pond in Cohasset to Cohasset Cove. Unfortunately, river herring and other fish are blocked from accessing habitat on the Brook by the Hunters Pond Dam. The Town of Scituate is concerned about the dam and Mordecai Lincoln Road, which lies overtop of it.

Repairing the dam would require approximately \$700,000 and still require maintenance. Removal of the dam will help restore connectivity for fish and wildlife moving between the estuary and the upper reaches of the Brook. It will also reduce the threat of dam failure that would close the road.
